Profiles   ◯ UmairAhmed750

in Umair Ahmed

Summary   A Front-End Developer is responsible for creating the visual and interactive aspects of websites and web applications. They use technologies like **HTML, CSS**, and **JavaScript** to build user interfaces that are responsive, accessible, and optimized for performance. Front-End Developers collaborate closely with designers and back-end developers to ensure seamless integration and a smooth user experience. They often work with frameworks like **React**, **Vue.js**, or **Angular**, and use tools such as **Webpack**, **Git**, and **Figma** in their development workflow.
